Dear Ray,

It was sad to hear the <sup>stories</sup> ~~stories~~ of loss and damage to stock, top soil, dams, banks and fences arising out of the heavy rains January 23 - February 11.

I am so pleased and grateful for the sound advice you gave Nelson & me as to constructing substantial absorption banks. No gullying, washing or real damage was suffered. The waters stayed uphill.

The works were a fine insurance for undulating lands otherwise susceptible to permanent disfigurement. Though I confess there were times when I thought that the Surveyors acted from an excess of caution and overdid the works - how glad I am now that you displayed such foresight ten years ago.

We send our kind regards to you & Nell.
